Runtime Monitoring

Runtime Monitoring is an easy way for you to monitor the state of your C# classes and objects during runtime. Just add the "Monitor" attribute to your classes, properties or event and go to open or state displayed automatically in a customizable and extensible UI.

Also available on the Asset Store!

[ExecuteInEditMode]
[Monitor]
[Monitor("Health")]
[Monitor("Health", Mode.Delta)]
[Monitor("Health", Mode.Delta, "Health")]
[Monitor("Health", Mode.Delta, "Health", Color.red)]
[Monitor("Health", Mode.Delta, "Health", Color.red, 0.1f)]
[Monitor("Health", Mode.Delta, "Health", Color.red, 0.1f, 0.5f)]
[Monitor("Health", Mode.Delta, "Health", Color.red, 0.1f, 0.5f, 0.5f)]
[Monitor("Health", Mode.Delta, "Health", Color.red, 0.1f, 0.5f, 0.5f, 0.5f)]
